XM Instant Traffic and weather is a valuable service and a service for which I pay. I use it where I live and I use it when I travel. In addition to Traffic & weather, this relatively new technology provides me with access to CNN, the BBC and a huge selection of music and information programming that I cannot get in any other way. I respectfully urge the FCC to reject the petition of the NAB (04-160). The NAB proposal would deny me and millions of others access to information for which we pay a monthly fee.

Thank you, Gregory Andracke, NYC
